

Be A Hero!

Add the Power of Genomic Testing to Your Employee Benefits Program

A Genetic Health Screen is a high-quality test that adheres to stringent medical and lab standards.

Employees complete the test in three easy steps:

- 1 Request test online from genomics-based company
- 2 Provide saliva sample from comfort of home, ship to lab
- 3 Results via secure platform only employee can access

Demonstrate Care and Concern for Your Employees' Health

Empower

Employees learn about predisposition to medical conditions to enable preventative steps

Access

Employee receives access to personalized resources and technology to inform decision-making

Personalize

Genomics supports the right treatment personalized for the individual

Target

Targeted therapy reduces ineffective treatments and invasive testing

Testimonial

"Having my employer pay for this says they care about me and my family." Male, 51

Invest in Workplace Wellness

Safe & Secure Platform

Employee / Physician Partnership

Accessible via employee benefits channel

Employees trust physician to interpret tests and provide guidance

Test results not shared with employer or insurer

Physician and patient determine next steps and action plan

Testing is highly accurate

Results sent directly to employee's physician

Consumer research indicates a positive reception to Genomic Life's offering supported by a growing genetic testing market (Value \$8B 2020, 10% CAGR).
