- Carcinoid Syndrome (NETs)

Recent Methodologies

- Chart Audits
- Visual aid / Sales aid testing
- In-person depth interviews
- Telephone depth interview
- Online quantitative surveys

Sample sizes up to 300 Oncologists

Recent Project Example

THERAPY TRACKING STUDY

Global pharmaceutical company request to consistently monitor prescribing trends and combinations over time and assess market events in real-time. We survey 80-90 oncologists on a quarterly basis. Study fields for 6-8 weeks, with a slight pause for adjustments before each quarter.

This study demonstrates Olson Research's ability to align our process with unique client needs. We combine our robust programming with specific tools to reduce respondent fatigue and boost engagement to consistently deliver on quota projections.
